

## Level 1 IRT- *Singapore*

### This Program Delivers Extraordinary Value

The program combines fundamental need-to-know material with new but already proven leading-edge approaches that have shown measurable return-on-investment.

Participants at the Institute of Infrared Thermography are from the world over and from a great mix of commercial industries and government organizations. Their satisfaction with these courses has been impressive.

Attendees at this course will receive four full days of instruction that includes a wide range of case-studies to show how the principles have been successfully and widely applied. As well, everyone will come away equipped with complete binder notes on the sessions' material plus relevant articles, standards and inspection templates.

### Learn by doing!

At The Institute of Infrared Thermography, we take a learn-by-doing approach to student development. Using IRT's practical hands-on approach, you will learn to develop frameworks for organizing, inspecting and analyzing real-life IR application situations.

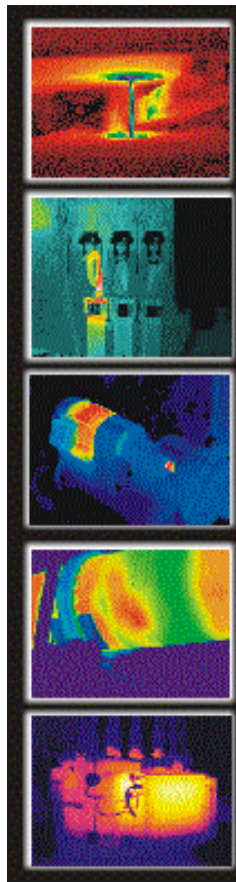

You will also learn the principles of the key PdM applications for facility and plant maintenance and buildings.

Workshops on your specific infrared camera will give maximum practical use throughout the course.

You will learn the inspection techniques and reporting procedures necessary to perform an effective Infrared PdM Inspection.

### Brand Independent

IRT trainers have experience on all infrared cameras. No matter what camera you own we provide accurate and unbiased information about your camera, accessories and applications and teach you to use it as efficiently as possible.

### Contact Information

### Unparallel Experience!

This Level 1 Infrared Certification course is the culmination of over 33 years of inspection and training experience in Infrared Thermography. Whether your interests are electrical, mechanical, industrial, building or commercial applications, we have the experience to meet your needs. Not to mention a learning experience that our students refer to as "unparalleled".

### Certification Standards

IRT is an *Accredited Training Organization* and Associate Member of BINDT. This means we have fulfilled all the requirements, and audits etc to be approved to teach this program. We provide training based on the BINDT PCN, ISO 18436, EN473, Norwegian, Australian and ASNT certification programs.

The Singapore course and certification is based on the ASNT SNT-TC-1A certification program.

*As well, IRT is the only approved and accredited training organization in Asia...and we are the company in the world accredited to teach the L2 IR/T ISO program.*

*No company or individual in Asia can claim this...look around, there are imposters...but IRT is the real deal!*

### World Class Instructors

IRT Instructors are world class! All have a minimum of 15 years of infrared thermography inspection experience and have focused their careers on this technique...not 10 others.

All Institute staff are active thermographers! You receive education from instructors who not only talk the talk... but walk the walk!!
